The Examination Questions in Surgery Practice.

№	Question	Professional competitions
1.	Special instrumental methods of patient's examination in urgent surgery.	OPK-4,10,11
2.	The indications and technique of pleural tapping (diagnostic thoracentesis).	OPK-4,10,11
3.	The indications and technique of laparocentesis (abdominal paracentesis).	OPK-4,10,11
4.	Differential diagnosis of acute appendicitis.	OPK-4,10,11
5.	The main steps of appendectomy.	OPK-4,10,11
6.	Peculiarities of the clinical course and treatment of appendicular infiltrate and periappendicular abscess.	OPK-4,10,11
7.	Treatment of acute appendicitis	OPK-4,10,11
8.	The main steps of herniotomy.	OPK-4,10,11
9.	Peculiarities of the operations in strangulated hernia.	OPK-4,10,11
10.	Determination of the pulsation of the arteries of the lower extremities.	OPK-4,10,11
11.	Methods of drainage of the pleural cavity.	OPK-4,10,11
12.	Thoracocentesis. Execution technique. Indications. Complications.	OPK-4,10,11
13.	Methods of patient's examination and treatment of acute cholecystitis.	OPK-4,10,11
14.	Differential diagnosis of acute cholecystitis.	OPK-4,10,11
15.	Peculiarities of the clinical course and treatment of acute obturative cholecystitis.	OPK-4,10,11
16.	The indications and types of cholegraphy.	OPK-4,10,11
17.	The indications for cholecystotomy. The types of cholecystotomy.	OPK-4,10,11
18.	Biliary ducts drainage. Indications. Types.	OPK-4,10,11
19.	Special methods of patient's examination in diagnosing jaundice.	OPK-4,10,11
20.	Diagnostic methods of acute pancreatitis.	OPK-4,10,11
21.	The indications for laparoscopy in patients with acute pancreatitis.	OPK-4,10,11
22.	The indications and methods of surgical treatment of acute pancreatitis.	OPK-4,10,11
23.	Diagnostic methods of acute intestinal obstruction.	OPK-4,10,11
24.	Peculiarities of the treatment in obturative and strangulated intestinal obstruction.	OPK-4,10,11

25.	Special methods of patient's examination in perforating ulcer of the stomach and duodenum.	OPK-4,10,11
26.	The main steps in the treatment of perforating ulcer of the stomach and duodenum.	OPK-4,10,11
27.	Diagnostic methods and treatment of gastrointestinal bleedings.	OPK-4,10,11
28.	Gastrostomy. Indications. Types.	OPK-4,10,11
29.	Diagnostic methods and treatment of pulmonary abscess and pulmonary gangrene.	OPK-4,10,11
30.	Methods of controlling bleeding (temporary and permanent hemostasis).	OPK-4,10,11
31.	Diagnostics and treatment of abdominal abscesses.	OPK-4,10,11
32.	The indications and technique of urinary bladder catheterization.	OPK-4,10,11
33.	Surgical principles in pyogenic diseases of the soft tissues.	OPK-4,10,11
34.	Examination methods in varicose veins of the lower limbs.	OPK-4,10,11
35.	Diagnostic methods and treatment of acute thrombophlebitis of the lower limbs.	OPK-4,10,11
36.	The indications for urgent operation on patients with acute thrombophlebitis of the lower limbs. The types of operations.	OPK-4,10,11
37.	Diagnostic methods in occlusive arterial diseases of the lower limbs.	OPK-4,10,11
38.	The indications and methods of surgical treatment in occlusive arterial diseases of the lower limbs.	OPK-4,10,11
39.	Diagnostic methods of portal hypertension.	OPK-4,10,11
40.	Arresting bleeding from varicose-dilated veins of the esophagus.	OPK-4,10,11
41.	The main steps of surgery in general (diffuse) peritonitis.	OPK-4,10,11
42.	Peritoneal lavage (dialysis). The indications and technique.	OPK-4,10,11
43.	Principles of treatment for chemical burns and cicatricial constrictions of the esophagus.	OPK-4,10,11
44.	Laparoscopic diagnostics of acute surgical diseases of the abdominal cavity.	OPK-4,10,11
45.	The main rules of postoperative management (bandaging, taking out the stitches, wound monitoring, care, nutrition, prevention of complications) in acute surgical diseases of the abdominal cavity.	OPK-4,10,11
46.	Surgical sutures. Types.	OPK-4,10,11

47.	Laparocentesis. Execution technique. Indications. Complications.	OPK-4,10,11
